

Supporting infrastructure Life-Cycle-Assessment using our Video analysis technology

Automatic detection of pipe breakage, cracking and deformation
The 8K camera is capable of detecting a 0.15mm crack in a ventilation pipe up 2m in diameter.

PISSEW - Pipe Inspection System for SEWER -

PISSEW use Simultaneous Localization and Mapping (SLAM). PISSEW can create a deployment map by using SLAM. The deployment map is an image that is corrected for distortions in the path that robot/drone navigated.
