

Anytime, Anywhere

8K video encoding technology

Our 8K video encoding technology delivers full 8K quality (85Mbps), even if the data is transmitted at 30Mbps or less (equivalent to 4K).

AI super-resolution technology provides efficient 8K video transmission

Our AI super-resolution technology provides full 8K quality video over a low bandwidth channel by integrating 8K video meta-data and 4K video down-converted content.
